

List of Experiments in Micro 304

Unit I: Techniques of Microbiology

Experiment 1 – Isolation of Microorganisms from Nature	22
Protocol for Experiment 1.....	26
Questions	32
Experiment 2-Microorganisms in food	34
Protocol for Experiment 2.....	37
Questions	41

Unit II: Bacterial Nutrition and Physiology, Preliminary Identification of Microbes

Experiment 3 – Oxygen Relationships and Bacterial Nutrition	43
Protocol for Experiment 3.....	51
Questions	56
Experiment 4 - Preliminary Characterization of Microorganisms	57
Protocol for Experiment 4.....	60
Questions	62

Unit III: Bacterial Growth and Regulation of Nutrient Utilization

Experiment 5 - Bacterial Growth	64
Protocol for Experiment 5.....	70
Questions	71
Experiment 6 - Induction of the lac Operon	73
Protocol For Experiment 6	77
Questions	80

Unit IV: Control of Microorganisms

Experiment 7 - Chemical Resistance and Antibiotic Sensitivity	82
Protocol for Experiment 7.....	86
Questions	87

Unit V: Enrichment and Isolation of Organisms from Nature

Experiment 8 - <i>Streptomyces</i>	93
Protocol For Experiment 8	95
Questions	97
Experiment 9 - The <i>Enterobacteriaceae</i>	98
Protocol for Experiment 9.....	103
Questions	109
Experiment 10- Lactic Acid Bacteria	113
Protocol for Experiment 10.....	116
Questions	118

Unit VI: Bacterial Genetics and Mutations

Bacterial Genetics Background	120
Experiment 11 - Bacteriophage	122
Protocol for Experiment 11.....	124
Questions	125
Experiment 12 - The Ames Test	126
Protocol for Experiment 12.....	128
Questions	129
Experiment 13 - Mutagenesis	129

Protocol for Experiment 13.....	134
Questions	136
Experiment 14 - Plasmid Isolation and Transformation	138
Protocol for Experiment 14.....	141
Questions	144
